

Approval Policy for Blackboard Learn Building Blocks

Blackboard Building Blocks (or BBs) are programs that can be added to Blackboard Learn to provide additional functionality. Some building blocks add new tools to Blackboard Learn. Others provide a way to integrate content from third-party tools directly into Blackboard Learn.

A list of Blackboard-created and Blackboard Partner-created building blocks can be found at:

[Zšš% • Will % % š o}PX o l } Œ X }ul](#)

Examples of Building Blocks currently used at UAFS include:

- x McGrawHill Connect
- x SafeAssign

In order to ensure that the Blackboard Learn service is working at maximum efficiency, Technology Services and Instructional Support will test all new building block software, prior to its deployment into the Production environment. These tests will ensure that the software does not
